PROFESSIONAL SUMMARY

Software Engineer with professional experience building scalable cloud-native architectures, fintech mobile applications, and enterprise web solutions. Proficient in AWS serverless infrastructure, React Native, React/Next.js, and C# .NET microservices. Adept at delivering production-ready applications, integrating secure third-party services, and collaborating within agile development environments

TECHNICAL SKILLS

Technical Skills:

- **Programming Languages:** JavaScript, TypeScript, Python, C/C++, Java
- **Frontend & Mobile:** React.js, Next.js, React Native, Micro-Frontends (MFEs), Framer Motion
- **Backend:** Node.js, C# .NET, FastAPI, REST APIs
- **AI & ML:** Model Fine-Tuning, RAG, LLaMA, Flan-T5, Qwen 2.5 8B, Llama 3.1 8B
- **Databases:** MongoDB, Firebase, SQL, Prisma, Cloudinary
- **Cloud & DevOps:** AWS (Lambda, Step Functions, EventBridge, EC2, S3, SWF), Jenkins, Snyk, Cloudinary, Vercel
- **Databases & Tools:** MongoDB, Firebase, SQL, Prisma, Git, GitHub, Jira, Postman, Snyk, Hugging Face

PROFESSIONAL EXPERIENCE

Devsinc, *Associate Software Engineer* 02/2026 – 10/2026 | Lahore, Pakistan

- **AWS Serverless & Cloud Workflows:**
  - Engineered and maintained AWS serverless workflows using **AWS Lambda, Step Functions (State Machines), and EventBridge** to automate media processing pipelines (e.g., video aspect ratio transformations).
  - Maintained legacy AWS SWF architecture alongside modern serverless components across multi-environment setups (Production, QA, Dev).
  - Utilized established Jenkins pipelines to test and verify build success across development environments and resolved security vulnerabilities utilizing **Snyk** integration tickets.
  - ***Technologies***: AWS Lambda, Step Functions, EventBridge, SWF, Jenkins, Snyk, AWS Serverless.
- **Fintech Mobile Application:**
  - Developed a production-grade, trading-based Fintech mobile application for the Saudi Arabian market as a **React Native developer**.
  - Integrated complex regional security workflows including **Nafath identity verifications** and core bank account integrations.
  - Managed the full mobile product lifecycle from complex state requirements to successful production deployment.
  - ***Technologies***: React Native, TypeScript, Fintech APIs, Nafath Verification, Payment/Bank Integrations.
- **Enterprise Frontend Micro-Frontends Architecture:**
  - Built upcoming features for 2027 within a complex **Micro-Frontends (MFE) React architecture** connected to Backend-for-Frontend (BFF) layers and backend **C# .NET microservices** in a monorepo structure.
  - Collaborated closely within a large enterprise codebase to deliver scalable and modular UI components.
  - ***Technologies*:** React, Micro-Frontends (MFEs), BFF Pattern, C# .NET, Microservices, Monorepo.

RemoteBase ↗, *AI Engineer* (*Part-time*) 12/2025 – 02/2026

- Provided **1:1 engineering support** for **SnapDev** ↗, an AI-powered **full-stack** application builder.
- Assisted users in building and debugging applications using **React.js, Next.js**, and **FastAPI**.
- Supported troubleshooting of AI-generated code and deployments on **cloud-based backend services**.
- Collaborated with product and engineering teams to identify recurring issues and improve developer experience.
- Worked on a **B2B AI + web platform** as a QA engineer, validating backend workflows involving **Redis** and **Celery workers**.

Technologies: React.js, Next.js, FastAPI, Redis, Celery, AI-assisted dev tools, Cloud Deployment Platforms, QA Testing

EDUCATION

Bachelor of Science in Computer Science 09/2021 – 12/2025
FAST National University of Computing and Emerging Sciences, Lahore

A levels, *The City School Sahiwal Campus* 08/2019 – 08/2021

- Pre-engineering

PERSONAL PROJECTS

CareHub 09/2025 – 11/2025

- Developed an Android application connecting doctors and patients through a secure mobile platform.
- Implemented role-based workflows where doctors manage availability and patients request appointments.
- Built an appointment request and approval system enabling doctor confirmation before scheduling.
- Integrated real-time chat functionality for direct communication between doctors and patients.
- Added advanced scheduling filters, profile management, and intuitive navigation with a modern UI.
- Implemented secure authentication and real-time data storage using Firebase Authentication and Firestore.
- Managed media uploads and profile images using Cloudinary.

Technologies: Java, XML, Firebase Authentication, Firestore, Cloudinary, Android Studio

CaseMate 01/2025 – 12/2025

- Built an AI-powered legal chatbot for Pakistan's laws to support pre-litigation guidance and case insights.
- Applied **Retrieval-Augmented Generation (RAG)** with OpenAI models to improve response accuracy and reduce fine-tuning needs.
- Implemented document analysis and predefined legal templates for structured legal assistance.
- **Technologies:** Python, JavaScript, Next.js, MongoDB, Firebase, FastAPI, RAG, LLaMA 3.1 (8B), OpenAi Models

LexiBot 11/2025 – 12/2025

- A general domain chatbot deployed on **AWS** and **Vercel,** built using **Next.js** and **Fast API**, with a sleek looking ui built using framer motion.
- **Technologies:** Next.js, Firebase, MongoDB, Framer Motion, Fast API, AWS EC2, Cloudflare, Vercel, Hugging face

SneakerHub 12/2025 – 01/2026

- Built a production-ready full-stack e-commerce platform with secure authentication, payments, and admin controls.
- Implemented **Stripe** payments and automated order confirmation emails.
- Developed a scalable backend using **Prisma** and **MongoDB** with a responsive **Next.js** + **TypeScript UI**.
- **Technologies:** Next.js, TypeScript, Prisma, Clerk, Stripe, MongoDB, Resend, Vercel
